

ECON

props

ECON props are the right choice for every kind of use giving effective assistance in daily work on the construction site.

Lightness, combined with high load capacity, ensures a higher yield in the phase of assembly / disassembly.

- Material: galvanized steel
- Load capacity: min. 20KN fully extended
- Standard: B/D class according UNI EN1065
- Greater performance during assembly phase due to reduced weight
- Anti-slip device to work safety
- High durability thanks to quality galvanizing and adjustable die-casted nuts

▼ Transport and storage

For storage and handling Condor provides the box for props cod. 52229
Capacity: 60 props per container
Features: resistant, durable, stackable.
Handling: suitable for handling with crane, pallet, forklift

▼ Technical Data
